

LING TUNG UNIVERSITY

DEPARTMENT OF
DIGITAL CONTENT DESIGN

LingTung University Department of Digital Content Design

is a prestigious program in Taiwan that focuses on the art of digital media making.

The department is divided into two major domains, **Dynamic Audio and Video Design** and **Perceptual Interactive Design**.

We aim to cultivate professionals in realms of television and film, animation, and game design.

Students graduated from the department are expected to be design yettie in the industry, with both media-making and coding skills.

Dynamic Video and Audio Design

To support our students in creating audio and video projects, we provide courses in the fields of animation production, film production, sound editing, and visual effects.

Our department has the biggest green screen sound stage in Taiwan. It's also the first sound stage equipped with Hollywood-level real-time VFX system here in the country.

Perceptual Interactive Design

Students who focus on perceptual interactive design can take classes on AR, VR, MR, App design, and interactive web design.

Our department invests a lot on the latest VR gadgets, as in the film *Ready Player One*, in order for our students to have hands-on experiences in the newest technology.

Hands-on Experiences!

We offer various design workshops, inter-school film and animation competitions, industry field trips, and internship opportunities every year!

International Cultural Exchange

International field trips, exchange student programs, and guidance to international competitions are all offered to our students!

Our students have left their footprints in universities all around the world.

Achievements

The creative projects our students made have won international prizes, such as Red Dot Design Award, NYLA International Film Festival, and Digicon6 Asia.

All to help you live your best student life!

Join us in the Department of
Digital Content Design.
Your career starts here!
